## **1.0 Identification of relevant stakeholders and suppliers in the Maltese islands for the water eco-label**

The purpose of this list is to outline stakeholders directly engaged in the importation and supply of category 1 and 2 water products in Malta. These stakeholders will be actively approached and interviewed to gather insights into their perspectives on the proposed eco-water label/s. However, it's essential to acknowledge that the influence of an eco-water label extends beyond these primary stakeholders. Entities like hotels, shopping malls, and consumers may also be indirectly affected by such labeling initiatives. While not the primary focus of this list and associated activities, it's important to recognize their potential impact within the broader context of implementing eco-water labels.

For this report have been identified a diverse range of stakeholders and suppliers across both the public and private sectors within the Maltese islands who might play an integral roles in the implementation of a water eco-label. These entities have been carefully selected due to their direct involvement and influence in various facets of water-related activities. By engaging with these stakeholders, we aim to foster collaborative efforts and garner valuable insights to ensure the successful implementation and adoption of a water eco-labelling system in Malta.
